Portfolio Website: <https://althafportfolio.site/>

SUMMARY

DevOps Engineer with 3.10 years of experience in cloud infrastructure automation, CI/CD pipeline implementation, Infrastructure as Code (Terraform), containerization, and monitoring solutions. Hands-on experience with **AWS, Docker, Kubernetes, Jenkins, GitHub Actions, Python, and Linux administration.** Proven track record of **automating deployments, reducing manual effort by 70%,** and supporting **highly available production environments** through **Agile, ITIL,** and DevOps best practices.

EDUCATION

Acharya Nagarjuna University

Master of Science (M.Sc.) in Computer Science

Dec 2022 - June 2024

Bachelor of Science (B.Sc.) in Computer Science

June 2019 - June 2022

SKILLS

- **Cloud Platforms:** AWS, GCP, Azure.
- **Infrastructure as Code & Automation:** Terraform, Ansible, Bash scripting, Python, YAML.
- **Containerisation & Orchestration:** Docker, Kubernetes, ECS.
- **CI/CD:** Jenkins, GitHub Actions, GitLab CI, AWS CodePipeline.
- **Monitoring & Logging:** CloudWatch, Prometheus, Grafana, Dynatrace.
- **Source Control Management:** GitHub, GitLab, Bitbucket.
- **Build & Quality Management:** Maven, SDLC collaboration, Checkstyle, SonarQube, Qualitygates, Trivy.
- **Artifact Repositories:** Nexus, AWS CodeArtifact, ECR, Docker Hub.
- **Linux Administration:** Package management, user management, service monitoring, troubleshooting.
- **Networking & Security:** VPC, subnets, security groups, IAM.
- **Collaboration & Processes:** Agile/DevOps, SDLC, ITIL, cross-functional team coordination.
- **Soft Skills:** Leadership, Communication, Teamwork, Problem Solving, Time Management, Documentation.

EXPERIENCE

DXC Technology

DevOps Engineer | Cloud & Platform Engineer

Aug 2022 – June 2026

Project Title: Cloud-Native Kubernetes Platform on Amazon EKS | AWS Managed Services

Duration: Mar 2024 – Apr 2026

Implemented a **cloud-native container platform on Amazon EKS** using **Infrastructure as Code (IaC)** and **Kubernetes orchestration**. Provisioned **Amazon EKS** clusters and AWS infrastructure using **Terraform**, implemented **CI/CD pipelines** with **GitHub Actions** and **Amazon ECR**, and configured **auto-scaling**, monitoring, and troubleshooting capabilities to ensure **high availability**.

Project Title: Cloud-Native CI/CD Automation Platform

Duration: Jul 2023 – Feb 2024

Implemented an **AWS-native CI/CD platform** for automated build, testing, and deployment workflows. Integrated **AWS Developer Tools**, implemented **Blue-Green** and **Rolling Deployment** strategies, enabled **Amazon CloudWatch** monitoring and notifications, and improved release consistency through **deployment Automation**.

Project Title: Enterprise Cloud Migration & Modernization Platform

Duration: Nov 2022–Jun 2023

Implemented a **highly available three-tier architecture on AWS** by migrating legacy workloads to the cloud. Provisioned **Amazon VPC** networking, implemented **Auto Scaling** and **Application Load Balancers**, configured and **Amazon RDS**, **RabbitMQ**, and **Memcached** services, and automated provisioning and deployments using **Bash scripting** and **Infrastructure as Code (IaC)** principles.

Roles & Responsibilities:

- **Automation & Environment Support:** Designed, implemented, and supported **CI/CD pipelines** and **AWS Infrastructure automation** using **Terraform** for AWS Managed Services environments.
- **CI/CD & Deployment Management:** Designed and maintained **Jenkins** and **GitHub Actions** **CI/CD pipelines**, integrating **Maven**, **SonarQube**, **Docker**, and **Amazon ECR**, while implementing end-to-end automation that **reduced manual effort by ~70%**.
- **Cloud Provisioning & Containerisation:** Provisioned and managed **AWS services** using **Infrastructure as Code (IaC)** principles and deployed containerized applications on **Docker**, **Kubernetes**, **Amazon ECS**, and **Amazon EKS** environments.
- **Monitoring & ITIL Operations:** Monitored infrastructure health using **Amazon CloudWatch**, **Grafana**, **Prometheus**, and **Dynatrace**, and managed incidents and change requests through **ServiceNow** in accordance with **ITIL** processes and **CAB** procedures.
- **Collaboration & Documentation:** Collaborated with development, QA, and infrastructure teams during **Agile ceremonies**, coordinated deployment and change activities, and created **Standard Operating Procedures (SOPs)** and operational runbooks.

ACHIEVEMENTS

- Implemented **end-to-end CI/CD automation**, reducing **manual effort by 70%** and improving **delivery efficiency**.
- Developed a **custom ServiceNow dashboard** for **incident tracking and SLA breach reporting**, improving operational transparency.
- Integrated **SonarQube quality gates**, **ECR management**, and **Slack notifications** for improved collaboration and feedback.
- **Successfully designed, implemented, and deployed** an **AI-powered portfolio and content automation platform** from scratch, integrating **Terraform**, **AWS**, **Docker**, **GitHub Actions**, and secure production hosting while independently resolving **complex infrastructure and deployment challenges**.
- **DXC CHAMPS Award – FY24 Q1**: Recognised for **consistent delivery**, **ownership of priority tasks**, and **reliable execution of infrastructure operations and production deployments**.
- **DXC CHAMPS Award – FY26 H1**: Awarded for **sustained performance**, **end-to-end accountability**, and **operational excellence** in supporting critical infrastructure services.

PERSONAL DEVOPS PROJECT

Project Title: AI-Powered Portfolio & Content Automation Platform

Duration: Oct 2025 – Present

Project URL: <https://althafportfolio.site/>

Implemented and deployed an **AI-powered portfolio and content automation platform** by provisioning **AWS infrastructure** using **Terraform**, containerizing services with **Docker**, and automating **CI/CD pipelines** using **GitHub Actions**. Configured **Amazon EC2**, **Amazon S3**, **Nginx**, and **Let's Encrypt SSL**, and implemented monitoring and environment management to ensure **secure and reliable production deployments**.

CERTIFICATES

- AWS Certified Solutions Architect – Associate
- AWS Certified AI Practitioner
- AWS Cloud Practitioner
- Google Cloud Professional Cloud Architect
- Microsoft Azure Administrator Associate (AZ-104)
- Azure Fundamentals (AZ-900)
- GitHub Foundations
